

Magnolia Fire Department

MEMORANDUM

No. 2025-07

Date: 6/24/2025

To: All

From: Operations Chief

Subject: Officer Phones

Members,

Officer phones will be used as the primary method of cellular contact for emergency ops units. This was implemented to speed contact efforts, provide backup comms, and improve department processes and function. Phones will be carried by or remain in close proximity to officers, unless wearing structural PPE.

A recent audit of these devices found that several were not even on the network, “4 total devices are not reaching the server due to them being turned off or having dead battery. 2 have been that way for just over 12 hours and 2 have been that way for days”.

Leadership will begin contacting units on these devices, failure to answer without mitigating circumstances is not acceptable.
